Physician Name (Printed or Typed)	
Office Address	(M.D. or D.O.)
Note to Providers: Non-contagious lesions do not require treatment prior to return to part yourself with NFHS Rules 4-2-3, 4-2-4 and 4-2-5 which states:	
"ART. 3 If a participant is suspected by the referee or coach of having a communical participation appear inadvisable, the coach shall provide current written documentation a physician stating that the suspected disease or condition is not communicable and that the opponent. This document shall be furnished at the weigh-in for the dual meet or tournam meet physician is present and is able to examine the wrestler immediately after the weigh considered acceptable and does not make the wrestler eligible to participate."	s defined by the NFHS or the state associations, from a e athlete's participation would not be harmful to any ent. The only exception would be if a designated on-site
"ART. 4 If a designated on-site meet physician is present, he/she may overrule the difform for a wrestler to participate with a particular skin condition."	agnosis of the physician signing the physician's release
"ART. 5 A contestant may have documentation from a physician only indicating a sp communicable skin conditions such as psoriasis and eczema, and that documentation is v understanding that a chronic condition could become secondarily infected and may requi	alid for the duration of the season. It is valid with the
Once a lesion is not considered contagious, it may be covered to allow participation.	
Below are some treatment guidelines that suggest MINIMUM TREA	TMENT before return to wrestling:
Bacterial Diseases (impetigo, boils) : To be considered "non-contagious," new lesions should have occurred in the preceding 48 hours. Oral antibiotic for three day lesions continue to develop or drain after 72 hours, CA-MRSA (Community Associated considered and minimum oral antibiotics should be extended to 10 days before returning over, whichever occurs last.	Methicillin Resistant Staphylococcus Aureus) should be
Herpetic Lesions (Simplex, fever blisters/cold sores, Zoster, Gladiatorum over with no oozing or discharge and no new lesions should have occurred in the precedi Gladiatorum), wrestlers should be treated and not allowed to compete for a minimum of swollen lymph nodes are present, that minimum period of treatment should be extended hours or full five days of oral anti-viral treatment, again so long as no new lesions have designed.	10 days. If general body signs and symptoms like fever and to 14 days. Recurrent outbreaks require a minimum of 120
Tinea Lesions (ringworm scalp, skin): Oral or topical treatment for 72 ho	urs on skin and 14 days on scalp.
Scabies, Head Lice : 24 hours after appropriate topical management.	
Conjunctivitis (Pink Eye): 24 hours of topical or oral medication and no discha	rge.

: 24 hours after curettage. Revised/Approved April 2008

Molluscum Contagiosum
